LOGAN MARTIN LAKE PROTECTION ASSOCIATION, INC.

The State of Georgia is proposing to divert 800 million gallons of water per day out of Alabama waterways for use by the City of Atlanta. If Georgia has its way, the water levels and water quality of Logan Martin Lake will be adversely affected. Logan Martin Lake Protection Association, Inc. is a non-profit corporation organized for the purpose of raising citizens' awareness and for the purpose of coordinating and acting as a focal point in an effort to influence the outcome of Georgia's attempt to divert water from the Coosa River and Logan Martin Lake. The citizens of Georgia are well organized and we need a voice in these "water wars".
